

Program Manager – Green Energy

UPDAL GREEN ENERGY UPPLANDS VÄSBY, SWEDEN FULL-TIME

Lead our Green Energy initiative and help us build a strong and sustainable energy business — driving programs from idea and business case through to execution and launch.

// THE COMPANY

A Swedish technology group.

Updal is a Swedish technology group built by experienced engineers and entrepreneurs with a passion for turning ideas into successful products.

We work across IoT, embedded systems and connected technology — helping customers take products from concept and development through certification, production and market launch. Our team covers hardware, firmware, software, mechanics and cloud solutions, either supporting customer teams or taking full responsibility for complete projects. But Updal is more than an engineering consultancy. We develop our own IoT products, invest in technology companies, and build new businesses and partnerships where our engineering experience and commercial mindset can make a difference.

We are a growing, entrepreneurial team where decisions are made quickly, ideas are encouraged, and people have the freedom and responsibility to make things happen.

// JOB DESCRIPTION

Lead our Green Energy initiative.

We are looking for a Program Manager to lead our Green Energy initiative and help us build a strong and sustainable energy business. You will mainly work with Green Energy, but you may also lead and support projects across other Updal companies.

You will drive programs and projects from idea to execution, working closely with our teams, partners, suppliers and customers. A strong business sense is very important in this role. You should understand not only how to deliver a project, but also why we are doing it, how it creates value and how we can build a successful business around it.

// WHAT YOU WILL DO

Key responsibilities.

- Lead and coordinate our Green Energy programs and projects.
- Lead and support projects across other Updal companies when needed.
- Take projects from idea and business case to execution and launch.
- Build clear plans, priorities and timelines.

- Work closely with technology partners, suppliers and customers.
- Coordinate product launches and market activities.
- Support the development of new partnerships and business opportunities.
- Follow up progress, budget, risks and key milestones.
- Coordinate across sales, technology, operations, logistics and service.
- Identify problems early and make sure they are solved.
- Help build processes and ways of working as the businesses grow.
- Always keep the business value and commercial opportunity in focus.

// WHO WE ARE LOOKING FOR

What we're looking for.

- Experience in program or project management.
- Strong business sense and commercial understanding.
- Experience from energy, EV charging, electrical products, automotive or technology is a strong advantage.
- Able to understand both the business and technical side of a project.
- Comfortable working with international partners and suppliers.
- Strong communication and coordination skills.
- Structured, responsible and able to move things forward.
- Hands-on and comfortable taking ownership.
- Comfortable working in a fast-moving environment where priorities can change.
- Fluent in English; Swedish or another Scandinavian language is an advantage.

// YOU WILL BE SUCCESSFUL IF YOU

Turn ideas into real business.

You enjoy taking ownership, bringing people together and turning ideas into real business. You understand that a successful project is not only about delivering on time — it also needs to create value for the company and our customers.

This is an opportunity to join our Green Energy initiative at an early stage while also working across the Updal group. You will have the opportunity to influence new businesses, products and partnerships and help turn good ideas into successful companies and projects.

△ IMPORTANT

Work & residence permits

Please note that we do not sponsor work & residence permits. If you apply, you need to already hold all permits required to work in the EU.
